

Position Title

Assistant Project Manager

Job Purpose

A Good Opportunity for ...

Project Analyst- Credit Function will be responsible for providing the analysis and coordination support to project implementation, monitoring and controlling process including designing the reports, presentation and monitoring parameters.

Key Responsibilities

- Lead the collection, validation, and analysis of data for assigned projects, providing insightful and actionable reports to support decision-making by senior management
- Monitor and drive project implementation progress, ensuring alignment with management directives, timelines, and expected outcomes; proactively escalate risks and propose mitigation strategies
- Coordinate cross-functional stakeholders within the Credit Function and other departments, translating business needs into clear project requirements and ensuring effective execution
- Take ownership of project governance, including tracking milestones, managing dependencies, and ensuring deliverables meet quality and compliance standards
- Develop and deliver high-quality presentations and reports for senior stakeholders, highlighting progress, key risks, performance metrics, and recommendations
- Collaborate closely with internal stakeholders (e.g., Branch Operations, Risk, and other relevant teams) to ensure smooth implementation and alignment with overall business objectives
- Drive problem-solving initiatives by identifying bottlenecks, analyzing root causes, and implementing practical, sustainable solutions
- Support the Project Manager in strategic planning, prioritization of initiatives, and continuous improvement of project management processes within the Credit Function

- Provide guidance and oversight to junior team members (e.g., Project Coordinators), ensuring accuracy, timeliness, and quality of outputs
- Lead implementation role to achieve quarterly team challenges

Job Requirements

- Bachelor Degree in IT, Business Management, Economics
- English (Communication Level)
- Minimum 1 year of working experience in project management role
- Proven ability to implement the assigned projects
- Core banking and credit products knowledge
