

Position Title

BI Analyst

Job Purpose

The BI Analyst will be a key member of the Analytics Center of Excellence, the role holder is accountable for working in business intelligence tasks as an individual contributor and responsible for delivering actionable insights, building robust BI solutions, and ensuring data-driven decision-making across the organization. This role requires strong expertise in SQL, Power BI, Excel, and data integration, with the ability to translate complex datasets into clear and meaningful business insights.

Key Responsibilities

1. Data Analysis & Insights

- Analyze large, complex datasets to identify trends, patterns, and opportunities.
- Provide timely and accurate insights to support business units and senior management.
- Build dashboards, reports, and KPIs in Power BI and Excel to monitor business performance.

2. BI Solution Development

- Design, develop, and maintain interactive reports and data models in Power BI.
- Optimize SQL queries, stored procedures, and views for performance and scalability.
- Collaborate with cross-functional teams to translate business requirements into BI solutions.

3. Data Integration & Management

- Integrate and validate data from multiple sources (databases, flat files, etc.).
- Ensure data quality, consistency, and accuracy across BI platforms.
- Work closely with Data Engineering and IT teams on ETL/ELT processes.

4. Governance & Standards

- Adhere to Analytics CoE best practices and governance frameworks.
- Contribute to establishing standard KPIs, definitions, and reporting templates.

- Support self-service BI initiatives and promote data literacy across business units.

Job Requirements

- Bachelor's degree in Computer Science, Information Systems, Data Analytics, or related field.
- 2–3+ years of experience in BI, data analysis, or analytics roles.
- Excellent communication skills with the ability to work across business and technical teams.
- Advanced SQL skills (query optimization, joins, subqueries, CTEs, stored procedures).
- Strong proficiency in Power BI (DAX, Power Query, modeling, dashboard design).
- Advanced knowledge of Excel (pivot tables, advanced formulas, Power Pivot).
- Strong problem-solving and critical-thinking abilities.
- Ability to translate business questions into analytical requirements.
- Experience in performance monitoring, forecasting, and ad-hoc analysis.
