

Position Title

Junior Business Solutions Specialist

Job Purpose

An Exciting Opportunity for ...

The Business Solution Specialist (Digital Banking) supports the analysis, design, and implementation of digital banking solutions. Assists in requirement gathering, process documentation, UAT execution, and issue resolution. Works with cross-functional teams to enhance user experience and ensure seamless system integration while contributing to project execution and continuous improvement.

Key Responsibilities

- Assist in gathering and documenting business requirements by coordinating with business and IT teams.
- Support the development and enhancement of Digital Banking products and features.
Prepare Process Flow Diagrams, BRDs, and SOPs under the guidance of senior team members.
- Conduct User Acceptance Testing (UAT) by executing test cases, recording test results, and assisting in test documentation.
- Provide second-level troubleshooting support for digital banking applications and escalate complex issues to senior team members.
- Collaborate with internal teams to ensure smooth implementation of digital banking solutions.
- Assist in training end-users on new features and preparing user manuals.
Track project progress and provide updates to senior team members and management.

Job Requirements

- Bachelor's degree in Computer Science or a related field, or equivalent education and related experiences

- Prefer 1-2 years of experiences in Digital Banking, Business Analysis, or a related field.
- Basic understanding of digital banking systems and financial services.
- Familiarity with UAT execution, requirement gathering, and documentation.
- Strong analytical and problem-solving skills with attention to detail.
- Self-motivated and quick to learn.
- Effective communication and teamwork abilities.
