

Position Title

Junior Project Coordinator

Job Purpose

The IT Project Coordinator is responsible for planning, executing, and closing technology-driven projects while ensuring delivery within scope, timeline, and budget. The role requires strong stakeholder management, cross-functional coordination, and structured project governance to achieve business objectives.

Key Responsibilities

- Ensure all projects are delivered on time, within scope, and within budget.
- Lead project teams and manage stakeholder expectations to achieve project objectives.
- Collaborate with IT, Product, Business, and Operations teams to align on project goals and deliverables.
- Manage communications with stakeholders, vendors, and executive sponsors to ensure transparency and alignment.
- Report project status, risks, and issues to the Project Management Team Lead and escalate when necessary.
- Track project progress, monitor milestones, and support the resolution of issues raised by the project team.
- Coordinate and manage assigned projects, ensuring collaboration with relevant stakeholders.
- Work on assignments provided by the Project Management Team Lead and Project Director.
- Oversee payment process tracking in coordination with Finance, Procurement, and Vendor teams, ensuring alignment with contract terms and project progress.
- Prioritize projects and allocate resources efficiently based on organizational goals and priorities.
- Conduct resource capacity planning to optimize utilization and control costs.
- Prepare regular management reports and executive presentations to communicate project performance.

- Facilitate project meetings, maintain documentation, and ensure all records are centralized and up to date.
- Maintain consistent and effective communication across teams to ensure timely decision-making.
- Promote continuous improvement in project management practices, tools, and methodologies (e.g., Jira).
- Ensure project outcomes are aligned with business objectives and support organizational success.
- Provide training or user onboarding support for project management tools when required.
- Capture and share lessons learned to strengthen future project execution.

Job Requirements

- Bachelor's degree in Computer Science or related field.
- Fresh graduates are also welcome.
- Minimum 1–2 years of experience in project management, preferably in IT or technology-related projects.
- Good Communication Skill.
- Organizational skills, including multitasking and time-management.
- Good in written and spoken English.
