

Position Title

Quality Assurance Engineer

Job Purpose

The role of a Quality Assurance Engineer is multifaceted, encompassing responsibilities related to automated testing, quality assurance, and process improvement. The role is pivotal in ensuring the efficiency, reliability, and quality of software products through the implementation of automated testing practices.

Key Responsibilities

- Follow STLC for both manual and automation testing
- Develop and implement an overall test automation strategy aligned with project goals and objectives.
- Implement and optimize automated test scripts for functional, regression, and performance testing.
- Research, evaluate, and recommend appropriate automation tools and technologies.
- Collaborate with cross-functional teams, including QA engineers, developers, and product managers to ensure comprehensive test coverage.
- Generate reports on test execution results and provide insights for improvement.
- Stay updated on industry trends and emerging technologies in test automation.
- Willingness and ability to learn relevant skills and tools on the job.
- Need to work a minimum of one year.
- Two months' notice is required to submit a resignation.

Job Requirements

- Degree in Computer Science, IT, or related field
- 1 to 3 years work experience in software quality assurance
- Proven experience as a Software Quality Assurance Engineer, with a focus on manual and automated testing
- Strong knowledge of software QA methodologies, tools and processes

- Strong understanding of SDLC and STLC
- Experience with Bug tracking tools (e.g., Jira)
- Proficiency in one or more programming/scripting languages (e.g., Java, Python)
- Experience with test automation frameworks (e.g., Selenium, Appium, JUnit, TestNG).
- Experience with performance testing tools (e.g., JMeter, Postman) is a plus
- Understanding of CI/CD pipelines and integration of automated tests into the pipeline
- Experience in writing clear, concise and comprehensive test plans and test cases
- Sharp analytical abilities, problem solving techniques, proven design skills and track record of delivery
- Excellent written and verbal communications
